▷ Education	
Bachelor of Fine Arts in Computer Game Design – George Mason University - Dean’s List - Certificate of Achievement: Game Programming Computer Science – Palomar College	

▷ Skills	
Engines: Unity, Unreal Engine, Godot Programming & Scripting: C#, C++, Java, Python Systems: Simulations Engineering, Systems Programming, Multiplayer Systems, Toolset Development, Back-end Design Design & Tools: Level Design, UI/UX Design, Menu Systems, Front-End Design, Blender, Maya, Adobe Suite Audio & Writing: Audio Engineering, Sound Design, Networking, Gameplay Writing	

▷ Experience	
Lead Engineer – Prelancer Studios 2024 – PRESENT - contact@prelancerstudios.com Developed and produced ARES Wargames simulation project. Created over 350 advanced and realistic simulated systems. Engineered and optimized network compatibility to ensure security and redundancy for long-term simulations. Established a dynamic and modular AI system with integrated avionics and datalink simulations. Modeled, Rigged, and outfitted over 100 unique assets to procure simulate wartime environments in Virtual Reality. Lead Gameplay Engineer – VRMILSIM.COM 2019 – 2024 Designed and produced 300+ VR military simulation levels, improving training realism and player engagement. Developed immersive physics solutions and advanced gameplay features for realistic training scenarios. Engineered and optimized multiplayer systems to ensure stability and accuracy across large environments. Collaborated with cross-functional teams to deliver polished player experiences. Level Designer – Project Community [PJKT Expo] 2020 Produced interactive virtual expo levels during the COVID-19 pandemic. Integrated sponsor advertising systems, ensuring stability for live events with over 10,000 attendees. Enhanced user experience through curated level design and interaction systems.	

▷ Awards & Achievements	
Most Immersive VR World – Metaverse Jam Featured Virtual Reality Community Developer – Shanie Awards Community Developer Award – Steam, Valve Software Certificate of Achievement: Toolset Developer – Hanno Academy Certificate of Achievement: Game Programming – George Mason University	

▷ Other Projects	
ARES [2025] – Advanced military wargames simulator in virtual reality. Crash Protocol [2024] – Physics-driven puzzle game featuring player body-transfer mechanics. ADMINTON [2023] – Competitive movement shooter game with fast-paced multiplayer.
